

Lombrico®

Zn

Stabilizes the cell
membrane

Activates protein
enzymes

Improves plant
internodes

Product with high Zinc content, specially designed to prevent and solve this type of deficiencies. Through its use it is possible to regulate a multitude of biological processes.

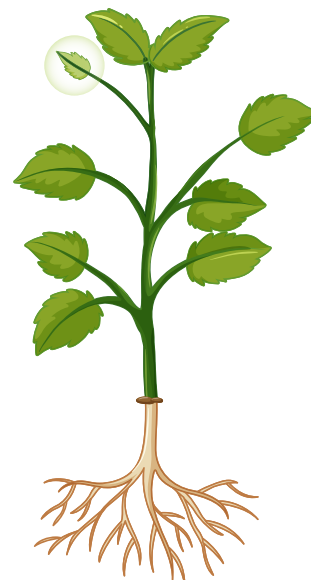

Lombrico® Zn is a product with a high concentration of zinc (Zn) designed to prevent and correct Zn deficiency in crops. Especially recommended in crops sensitive to Zn deficiencies, such as corn, onions, beans, rice, fruit trees, citrus fruits, vines, etc., and in states deficient in this element.

ZINC LACK IN THE PLANT

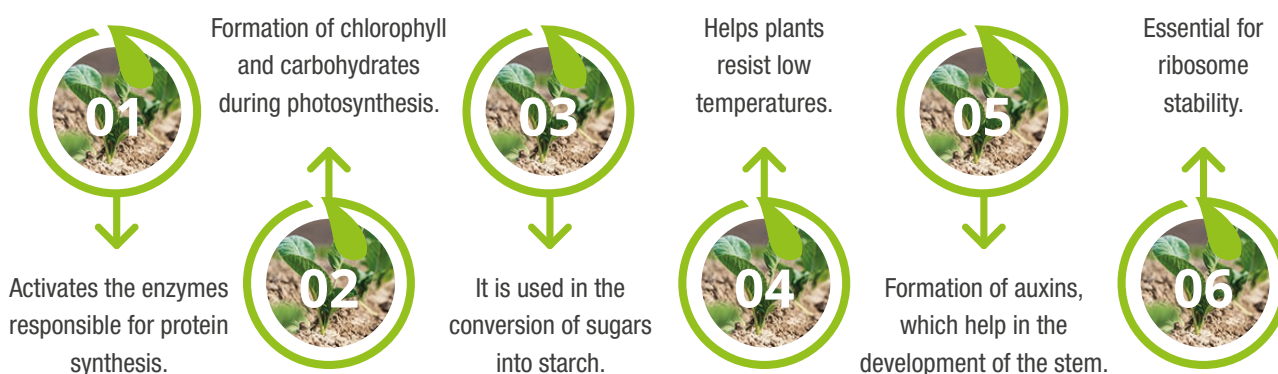

- ✓ Chlorosis develops on the lower adult leaves.
- ✓ Leaf margins retract.
- ✓ Large necrotic spots appear between and on the nerves.
- ✓ The new leaves are dwarf.
- ✓ Short leaf peduncles.

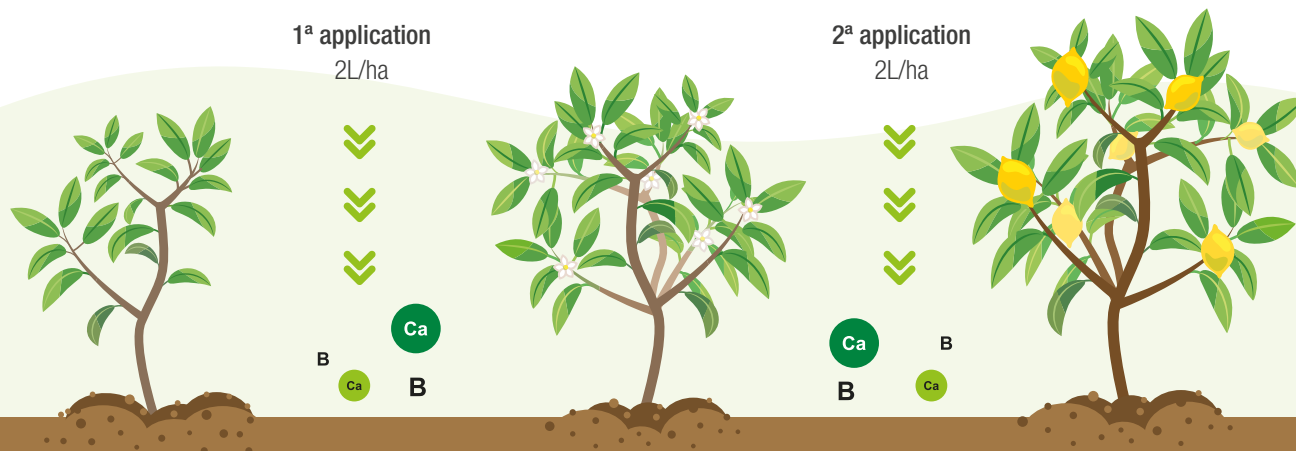

VALID FOR ANY TYPE OF CROP

THE IMPORTANCE OF ZINC IN PLANTS:

EVOLUTION CYCLE
